

eIDAS Assurance Levels

EU Electronic Identification Trust Framework

Requirements	Use Cases
<div>HIGH<ul style="list-style-type: none">* In-person or remote with NFC + liveness* Government-issued eID* Biometric verification* Photo match to authoritative source</div>	<div>Banking, healthcare, legal documents, government services</div>
<div>SUBSTANTIAL<ul style="list-style-type: none">* Remote identity proofing* Document + selfie verification* Database checks* Liveness detection</div>	<div>Account opening, age verification, KYC</div>
<div>LOW<ul style="list-style-type: none">* Self-asserted identity* Email/phone verification* Basic attribute validation* Social login acceptable</div>	<div>Newsletter signup, basic access, non-sensitive services</div>

Increasing Assurance

Higher assurance = More rigorous proofing = Greater trust in identity claim
