

## Lesson 9: InsurTech

### Module 1: FinTech Fundamentals

Digital Finance

## Legacy Problems

- Manual underwriting
- Slow claims processing
- High operating costs (25-30%)
- Customer experience gaps

`figures/insurance_pain_points.pdf`

`figures/insurtech_value_chain.pdf`

## AI-First Insurer

- Founded: 2015
- 90 second policy purchase
- 3 minute claims (simple)
- Behavioral economics model

`figures/lemonade_model.pdf`

figures/lemonade\_economics.pdf

## Behavioral Innovation

- Flat 25% fee
- Remaining to causes
- Reduces fraud incentive
- Community alignment

`figures/giveback_model.pdf`

## AI Jim

- Computer vision analysis
- Anti-fraud detection
- Instant approval (40%)
- Human escalation

figures/ai\_claims\_flow.pdf

## Telematics Revolution

- Pay-per-mile models
- Driving behavior tracking
- 30-50% savings potential
- IoT sensor integration

`figures/ubi_model.pdf`

figures/telematics\_data.pdf

## UBI Pioneer

- 14M enrolled drivers
- Average 16% discount
- Hard braking penalty
- Mileage-based pricing

`figures/progressive_snapshot.pdf`

## Index-Based Payouts

- Predefined trigger events
- No claims adjuster needed
- Weather derivatives
- Instant payout automation

figures/parametric\_concept.pdf

figures/parametric\_examples.pdf

## Automated Payout

- Delay > 2 hours = trigger
- Flight data API integration
- Instant payment via app
- No claim form required

`figures/flight_delay_insurance.pdf`

## Point-of-Sale Integration

- E-commerce checkout
- Travel booking sites
- Ride-sharing apps
- Device purchases

figures/embedded\_insurance.pdf

`figures/insurtech_segments.pdf`

## New Channels

- Digital brokers (PolicyGenius)
- Aggregators (Compare.com)
- White-label platforms
- API-first models

*figures/distribution\_channels.pdf*

## Compliance Burden

- State-by-state licensing
- Capital requirements
- Rate approval process
- Data privacy constraints

figures/insurance\_regulation.pdf

## Digital Transformation

- Partnerships with startups
- In-house innovation labs
- Acquisitions (MetLife → Versicherix)
- API platform development

figures/incumbent\_insurtech\_strategy.pdf

## From Reactive to Proactive

- IoT risk prevention
- Health wearable integration
- Smart home monitoring
- Dynamic pricing

figures/predictive\_insurance.pdf

## Key Takeaways

- **Lemonade:** Behavioral economics + AI reduces costs to 25%
- **UBI:** Telematics enables 30-50% personalized discounts
- **Parametric:** Automated triggers eliminate claims process
- **Embedded:** Point-of-sale integration captures moments
- **Future:** Predictive prevention over reactive coverage
