

Lesson 10: RegTech

Module 1: FinTech Fundamentals

Digital Finance

Regulatory Complexity Crisis

Compliance Burden

- 300M+ pages of regulation
- \$270B annual compliance cost
- 500+ updates per day
- Manual processes fail

[figures/regulatory_volume_growth.pdf](#)

figures/regtech_landscape.pdf

RegTech Categories

Five Core Areas

- Compliance management
- Transaction monitoring
- Regulatory reporting
- Risk management
- Identity verification

figures/regtech_categories.pdf

Anti-Money Laundering (AML)

AML Challenge

- \$2T laundered annually
- 0.1% detected (UN estimate)
- \$26B in fines (2008-2023)
- False positive rate: 95%

figures/aml_problem_scale.pdf

Traditional AML Process

`figures/traditional_aml_process.pdf`

Transaction Monitoring

Rule-Based Systems

- Threshold triggers (\$10K)
- Velocity checks
- Geographic patterns
- 99% false positives

figures/transaction_monitoring_rules.pdf

figures/ml_aml_architecture.pdf

Behavioral Features

- Network graph analysis
- Time-series patterns
- Entity relationships
- Reduces FP to 70%

figures/ml_features_aml.pdf

ComplyAdvantage Case Study

AI-Powered Screening

- Real-time sanctions screening
- Natural language processing
- Dynamic risk scoring
- 2,000+ financial institutions

[figures/complyadvantage_workflow.pdf](#)

Reporting Requirements

- MiFID II: 65 data fields
- EMIR: Trade reporting
- Basel III: Risk metrics
- Frequency: Daily/real-time

figures/regulatory_reporting.pdf

Automated Reporting Flow

`figures/automated_reporting_flow.pdf`

Know Your Customer (KYC) Technology

Digital KYC

- Document verification (OCR)
- Biometric authentication
- PEP/sanctions screening
- Continuous monitoring

figures/kyc_regtech_flow.pdf

Risk Assessment Platforms

Dynamic Risk Scoring

- Real-time risk calculation
- Multi-dimensional factors
- Regulatory change tracking
- Stress testing automation

figures/risk_scoring_model.pdf

figures/regtech_market_growth.pdf

Cost Reduction Analysis

Efficiency Gains

- AML analysts: 50% reduction
- Reporting costs: 70% lower
- False positive rate: 30% reduction
- Time to compliance: 80% faster

figures/regtech_cost_savings.pdf

Regulatory Sandboxes

Innovation Testing

- FCA (UK) pioneer
- Limited-scope testing
- Regulatory guidance
- 80% go to market

figures/regulatory_sandbox.pdf

`figures/global_sandboxes.pdf`

Challenges and Limitations

Implementation Barriers

- Legacy system integration
- Data quality issues
- Regulatory acceptance lag
- Explainability requirements

figures/regtech_challenges.pdf

Future: Embedded Compliance

Next Generation

- Real-time compliance
- Machine-readable regulation
- Automated policy updates
- Suptech convergence

figures/embedded_compliance_future.pdf

- **Problem:** \$270B compliance costs, 95% false positives
- **ML AML:** Reduces false positives from 99% to 70%
- **Automation:** Reporting costs down 70%, time down 80%
- **Sandboxes:** 80% of tested innovations go to market
- **Future:** Real-time embedded compliance automation
